Employment History

QA Engineer, YETI

Apr 2018 – Apr 2019 📍 Austin, Texas

- Created and maintained automated unit and E2E test suites for a faster more reliable release cycle using Jest, Enzyme, and Puppeteer
- Enforced business rules using Node
- Enabled OAuth to NetSuite API calls to increase security and decrease maintenance
- Built GUI testing tool for sales teams using React to enable larger order tests

Instructor, Code.org

May 2017 – Apr 2018 📍 Remote

- Developed course material and conveyed complex computer science topics in a practical and engaging way

Applications

Pretzel News

Native iOS application that uses Google Trends data to present unbiased news.

<http://pretzel.news>

Represent

An application built to learn about your representatives in a visually stimulating way.
