EXPERIENCE

ThriveHive, Denver, CO — Quality Engineer

August 2019 - Present

- Structured testing suites and created CI pipelines for iOS application to enable consistent deployments.
- Built end-to-end testing suites using Puppeteer and Jest to run nightly production tests.
- Verified releases met quality expectations according to design and functional requirements.
- Implemented test plans to sprint cycle and carried out test cases for more stable releases.

YETI, Austin, TX — QA Engineer

April 2018 - April 2019

- Translated wireframes to responsive web pages using Handlebars, HTML, CSS, and JavaScript.
- Implemented automated unit, regression and E2E suites for a more reliable and efficient release cycle.
- Increased security and maintainability by implementing OAuth to all external API calls.
- Developed GUI test harness using React to enable exponentially faster testing of large orders.
- Established Agile methodologies as Scrum Master by conducting scrum rituals and organizing artifacts.

APPLICATIONS

Pretzel News, <http://app.pretzel.news>

- Integrated external API calls using GraphQL to unify legacy APIs and present data in news feed.
- Structured sprints using Scrumban methodologies to develop roadmaps and velocity planning.
- Fetched Google search trends by reverse engineering Google's internal visualization endpoint.
- Created consistent and accessible UX flow by utilizing simple and high contrast UI elements.

Represent, <https://jameskip.com/represent>

- Designed UI to present complex data sets in a visually stimulating way using InVision.
- Produced iOS application bundle using custom React Native components.
- Built API test suite to verify data integrity and accuracy using Postman.

EDUCATION

Hack Reactor, 2016 - 2017, Austin, TX

Advanced Full-stack Software Engineering Immersive Program

San Antonio College — A.A.S., 2010 - 2012

Programming Logic and Design, Networking, SQL, PHP, C++, Java, .NET, Security

SKILLS

Proficient: CSS, Docker, Express, Firebase, Git, Google Cloud Platform, GraphQL, Gulp, HTML, Javascript, MongoDB, Node, PostgreSQL, React, React Native, Redux, Sass, Typescript, Scrum, Agile, Bootstrap, REST, Less, jQuery, Jest, Enzyme

Familiar: Python, Swift, Django, Webpack, Grunt, Azure, Angular, Jekyll, Tensorflow, Web Components, Objective-C

CERTIFICATIONS

- Certified ScrumMaster (CSM)
- Google Mobile Web Specialist
